

UNIVERSAL TELECOM SERVICES, INC. (UTS)

Dedicated Communications Services To and From Vietnam.

The UTS Advantage: Achieving the Highest Standards of Reliability

As a "carrier's carrier," we're more than just a vendor – we're the business-critical partner of choice of many large and prominent foreign companies.

- Our strong local operating presence in Vietnam includes a solid partnership with VISHIPEL – an industry giant with more than 50 years of experience in the Maritime and satellite communication sectors.
- We've built confidential relationships with customers who expect the highest standards of reliability and Quality of Service (QOS). Our managed satellite bandwidth and network infrastructure deliver that superior quality and dependability at the lowest possible cost.
- As a well-established American company doing business in Vietnam, we fully understand the communications needs of AMCHAM members, and are poised to meet those needs efficiently, securely, and cost-effectively.

The UTS Mission: Building the Best Network Possible

We are dedicated to providing ubiquitous, high quality, and low cost communications services to enterprises throughout Vietnam. Our goals are to:

- Build a world-class wholesale voice and IP backbone network with global connectivity
- Satisfy the demands and expectations of foreign enterprise customers in Vietnam
- Increase the use of mobile, wireless, and VSAT technology
- Lower the cost, and broaden the scope, of services to enterprise customers
- Enhance the technological capabilities of the communications infrastructure in Vietnam

UTS Offerings: Serving All of Your Communications Needs

UTS is the first provider of International Point-to-Point (PSTN) Carrier Services to and from Vietnam – with dedicated and directly managed international access for International Long Distance (ILD) telecommunications services. In addition to offering Domestic Long Distance (DLD) on the "175" network, UTS also provides private voice and data networks (IPLN), and VSAT deployment for all commercial applications, including fixed local telephony for rural areas and remote locations, Internet services, and distance learning.

The UTS Network provides direct “Switch to Switch” and “Gateway to Gateway” connectivity and services without added switching – featuring routing capable of uninterrupted high quality service. This is made possible through the use of advanced satellites as well as monitor and control systems that are seamlessly connected via our gateways and state-of-the-art Network Operation Center based in Hawaii.

Current services include:

- Voice Over IP
- In-Country Voice Nodes (POPs)
- IP Network Nodes
- Managed Bandwidth

Services in development include:

- Value-added commercial application services using VSAT
- Business-critical communication and unified messaging services

Building a Foundation and Future in Vietnam

Universal Telecom Services, Inc. (UTS) is an affiliate of the Orchard Capital Group of Companies in California with interests in real estate, financial services, airline cargo, and information technology. Heavily invested in Vietnam’s communications and IT sectors since 2000, UTS is engaged in a Business Corporation Contract (BCC) with two Vietnamese partners that include Binh Minh Co., Ltd. and VISHIPEL, a member of the venerable Vietnam Maritime Department. Operating under authority of Investment License No. 2280/GP/2002 of the MPI, UTS is the first American telecommunications carrier, among six in Vietnam, to provide direct point-to-point satellite gateway access to Vietnam.

Call Us Today

Please contact us to discuss any of your communications requirements. We appreciate the support of all members of AMCHAM and are committed to maximizing your business growth and opportunities in Vietnam.
